

Diabetes & Oral Health

People living with diabetes may have a higher risk of developing complications to the teeth, gums, and tongue due to changes in the body and a weakened immune system. High blood sugar, also known as hyperglycemia, plays a role in increasing these risks, so it is important to routinely monitor and manage your blood sugar levels.

Let us look at some of the oral conditions to be mindful of and ways to prevent them and care for your oral health.

Goodbye Winter Boots, Hello Summer Shoes & Sandals!

Spring has sprung – and with that, it’s time to put away our winter boots and bring out our summer footwear! We all know that when we start wearing shoes for a different season, blisters and sore feet often occur, leaving our feet in pain.

Read more for tips to keep in mind when switching up your footwear this spring.

Your Eyes and Overall Health – It’s All Connected

It’s important to remember that the eyes are connected to many other systems in the human body. That makes routine eye exams an important part of preventative healthcare — regardless of your age or physical health.
